General information

Date
Friday, 15.02.2019, 15:00 to Saturday, 16.02.2019, 17:00

Venue
Comprehensive Heart Failure Center (CHFC)  
Am Schwarzenberg 15 (A15), 97078 Würzburg

Aim & objectives
Acquainting young researchers, medical doctors and medical students with concepts and challenges of translational research using concrete examples from early (from basic sciences to clinical research) as well as late (from clinical research to clinical practice) translational research projects.

Participants
Students from the Program and Master Course Translational Medicine, members of the section Clinical Sciences of the GSLS, external guests

Organisation
Institute of Clinical Epidemiology and Biometry (Peter Heuschmann, Cornelia Fiessler, Steffi Jiru-Hillmann, Martha Schutzmeier), Biocenter University Würzburg – Chair of Developmental Biochemistry (Manfred Gessler, Stefanie Hauser), Comprehensive Heart Failure Center (Stefan Störk, Nicole Reinhard)

Contact and registration
Steffi Jiru-Hillmann
Phone: 0931/201-47304
Fax: 0931/201-647310
Email: steffi.hillmann@uni-wuerzburg.de

Funded by
Elite Network of Bavaria –  
Bavarian State Ministry of Education and Cultural Affairs  
Comprehensive Heart Failure Center

Winter School “Clinical Epidemiology” goes “Translational Medicine and Clinical Science”

It is a great pleasure to invite you to the first Joint Winter School “Translational Medicine and Clinical Science” in Würzburg! The tradition of a Winter School in Würzburg was founded in 2012 in parallel with the establishment of the Section Clinical Science in the Graduate School of Life Sciences (GSLS) as well as the foundation of a Program Clinical Research and Epidemiology for Medical students. The former Winter School “Clinical Epidemiology” focused on challenges of translating clinical research into clinical practice. In 2018, the new program and Master course in “Translational Medicine” funded within the Elite Network of Bavaria started. Thus, we will take the opportunity to cover the whole spectrum of translational medicine within the Winter School including also aspects of early translational research.

The new concept of the Winter School will serve as one of the principal components of the teaching and training activities in translational medicine for medical students and young researchers here in Würzburg.

The organization and realization of the Winter School is supported by the Elite Network Bavaria, the Comprehensive Heart Failure Center (CHFC) and the Institute of Clinical Epidemiology and Biometry (ICE-B).

The Winter School “Translational Medicine and Clinical Science” will highlight challenges in a timely translation of findings from the basic science into clinical research as well as of results from clinical studies into clinical practice using concrete clinical examples. Within the first Winter School, the rationale of a currently started European Union funded project will be presented addressing the question of appropriate secondary prevention in patients with intracranial hemorrhage and atrial fibrillation.

An internationally recognized faculty including guest speakers from across Germany will give the seminars and lectures. We wish all fellows a successful Winter School and a fruitful and lively discussion among all participants!

---

**Agenda**

**Friday**

<table>
<thead>
<tr>
<th>Time</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 15:00</td>
<td>Get together</td>
</tr>
</tbody>
</table>
| 15:15-15:30 | Welcome and introduction to the course  
Peter Heuschmann & Manfred Gessler |
| 15:30-16:30 | Seminar 1: Introduction to the clinical topic of intracranial hemorrhage and atrial fibrillation  
Karl Georg Häusler |
| 16:30-17:00 | Coffee Break                                                             |
| 17:00-18:00 | Seminar 2: Anticoagulation without bleeding – Dream or reality?  
Guido Stoll |
| 19:00 | Dinner                                                                   |

**Saturday**

<table>
<thead>
<tr>
<th>Time</th>
<th>Activity</th>
</tr>
</thead>
</table>
| 09:30-11:15 | Seminar 3: Systematic review and meta-analysis “Long-term antithrombotic treatment in intracranial hemorrhage survivors with atrial fibrillation”  
Eleni Korompoki |
| 11:15-12:00 | Presentation of group work results                                        |
| 12:00-13:00 | Lunch                                                                    |
| 13:00-14:30 | Seminar 4: Development and conducting the PRESTIGE-AF-Study  
Roland Veltkamp |
| 14:30-15:00 | Coffee break                                                             |
| 15:00-16:30 | Seminar 5: Presentation of the observational study RASUNOA to collect prospective data in patients with stroke and atrial fibrillation  
Jan Purrucker & Kirsten Haas |
| 16:30-17:00 | Feedback and closing remarks  
Stefan Störk & Götz Gelbrich |

---

**Faculty**

- **Götz Gelbrich**  
  Professor of Biometry, Institute of Clinical Epidemiology and Biometry, University of Würzburg

- **Manfred Gessler**  
  Professor of Developmental Biochemistry, Biocenter, University of Würzburg

- **Kirsten Haas**  
  Research Associate, Institute of Clinical Epidemiology and Biometry, University of Würzburg

- **Karl Georg Häusler**  
  Professor of Neurology, Department of Neurology, University Hospital Würzburg

- **Peter U. Heuschmann**  
  Professor of Clinical Epidemiology, Institute of Clinical Epidemiology and Biometry, University of Würzburg

- **Eleni Korompoki**  
  Academic Consultant at the 1st Department of Neurology, University of Athens

- **Jan Purrucker**  
  Consultant, Department of Neurology, University Heidelberg

- **Guido Stoll**  
  Professor of Neurology, Department of Neurology, University Hospital Würzburg

- **Stefan Störk**  
  Professor of Clinical Epidemiology of Heart Failure, Comprehensive Heart Failure Center Würzburg

- **Roland Veltkamp**  
  Professor of Neurology, Alfried Krupp Hospital, Essen
